SUPER ERECTA SHELF® SLANTED-SHELF MERCHANDISER/ DISPENSER RACKS

- **Slanted-Shelf Merchandiser in Four Models:**

All four models feature slanted shelves for high visibility and quick, easy accessibility to merchandise. Retail uses include display of magazines, books, records, housewares, toiletries, clothing, open baked goods (breads, bagels, rolls), packaged foods, etc.

- **Instant Identification of Merchandise:** Open wire construction and slope of shelves permit instant identification. No more searching – the merchandise your customer seeks is in plain view.

- **Inventory Control:** Merchandise is neat and organized on the shelves for precise control of inventory. Eliminates duplication and confusion in ordering.

- **Easy Loading & Removal of Items:** The slanted design of the shelves makes loading quick and easy, and simplifies rotation of perishable items. Shelves are self-feeding, so merchandise is always at the front, within easy grasp.

- **Four-Inch (102mm) Retainers** serve as ledges at the ends of each shelf to prevent items from sliding off. Adjustable . . . retainers may also be used as dividers to keep rows of merchandise separated. Twelve retainers are supplied with each cart; extra retainers may be ordered as accessories.

- **Five-Inch (127mm) Casters** enable Slanted-Shelf Merchandiser to be moved easily for restocking or to a new location. Brakes on front casters make it simple to lock merchandiser in position.

- **Adjustability:** Shelves can be adjusted at 1" (25mm) intervals along the entire height of the post.

- **Chrome-Plated Finish** offers a clean, open-air appearance and gives an aesthetic appeal to the merchandise displayed.

- **Shipped Knocked Down** to save on freight costs. Easily assembled in minutes.
