

Aluminum Chiavari Chair

Mity-Lite's new Aluminum Chiavari stacking chair combines classic elegance with unmatched durability in an eco-friendly platform. Weighing in at only 8 lbs yet possessing the ability to withstand over 1,000 lbs of static load, the Aluminum Chiavari can support over 125 times its own weight! The 100% welded aluminum frame eliminates chair sway so common among competitor chiavari chairs providing peace of mind for both you and your customers. Lightweight handling make set up and take down of any event a breeze, while removable cushions allow for dense stacking and extend cushion life. Perfect for use in the ballroom, the dining hall, or for any event where the classic chiavari look is desired.

Benefits

- 40% lighter & 2.5X more durable* than leading competitor resin chairs
- Environmentally friendly - 100% recyclable
- 100% welded aluminum construction = greater durability = reduced cost of ownership
- Removable vinyl seat cushion for dense stacking & longer cushion life (Optional)
- Ships complete—no assembly required

Features

- Durably constructed to hold 1,000 lbs. (455kg)
- 7 welded leg support bars for superior stability
- UV treated paint prevents fading & discoloration
- Non-marring feet & stack buttons—made from recycled plastic
- Plush 2" cushion with luxurious leather feel (optional)
- Five-year limited warranty

**Based on internal BIFMA testing*
